Release for Video and Medical Record Reviews

I/We, _____, have asked the staff of The Adoption Health Services of Western Pennsylvania to review the medical history and videotape of the child/children whom I/we may adopt. I/We realize that a review of a brief history and/or video can only identify grossly obvious medical or developmental strengths or difficulties in a child, and can in no way be used to accurately predict his/her medical, developmental, behavioral, or psychological outcome. I/We absolve Dr. Springer, Ms. Schwab, Adoption Health Services of Western Pennsylvania, and Kids Plus Pediatrics from any legal responsibility for outcomes in this child/these children which were not predicted by reviewing this history and/or video.
